Warning: Reports submitted to VAERS may contain information that has not been verified.
- **Adverse events in a report may or may not have been caused by the vaccine.**
- **Reports may be submitted by anyone, including persons who do not have access to medical records or other medical information, and may contain incomplete information.**
- **Medical personnel, the VAERS staff, and others review the reports and may request more information, but not all requested information is received.**
- **Reports are accepted by VAERS for review, regardless of the quality of the information they contain. Some reports are incomplete, others are clear and well-documented.**
- **Reports are reviewed by VAERS staff and medical personnel to identify those that may be of medical importance or interest, and to identify trends and patterns.**
